Conclusion

Foreword by the Minister

As the Minister of Higher Education for the Maldives, I am both honoured and humbled to present this booklet, a vital snapshot of our nation's higher education landscape at a moment of unprecedented challenge and change.

The global pandemic and the resulting lockdowns have left an indelible mark on every aspect of our lives and higher education in the Maldives is no exception. This period of crisis has tested our resilience, compelling us to adapt and innovate in the face of extraordinary constraints.

In this booklet, you will discover an inspiring narrative of triumph over adversity. Despite the limitations imposed by the pandemic, our educational system has witnessed encouraging trends, such as a rise in overall enrollment and a marked increase in students choosing the sciences and technical fields. These achievements are a powerful testament to the resilience,

"Despite the limitations imposed by the pandemic, our educational system has witnessed encouraging trends, a powerful testament to the resilience, creativity, and dedication of all who have a stake in higher education" - Dr. Ibrahim Hassan

creativity and dedication of our students, educators, administrators and all who have a stake in higher education.

However, there are areas where we must strive to do better. The pandemic has also spotlighted areas that demand our focused attention and concerted effort. We must continue to work to expand our international collaborations, foster inclusive education and ensure that our educational institutes are fully equipped to meet the ever-changing needs of our dynamic society and global trends.

I extend my gratitude to all those who have been a part of this journey and encourage every reader to use this booklet as a source of insight, understanding and motivation. May we move forward with renewed vigour, embracing the lessons of this unique period in our history and striving together to realise our vision for higher education.

Sincerely,

Ibrahim Hassan, PhD
Minister of Higher Education

Executive Summary

This Statistics Booklet presents a comprehensive overview of higher education data and trends in the country for the academic years 2019 - 2023.

The fields of study with the local highest enrollments are management and administration, religion and theology, nursing and midwifery, teaching, accounting, law and programming. The least popular subjects include philosophy and ethics, fine arts, environmental sciences, journalism and reporting, therapy and rehabilitation, building and civil engineering and literature and linguistics. There has been a notable increase in enrollments in pharmacy, psychology, motor vehicles, ships and aircraft, as well as in fashion, interior and industrial design. However, there's been a decrease in enrollments in travel, tourism and leisure, literature and linguistics, architecture and town planning and environmental sciences.

During the same period, the government's First Degree Scheme saw the enrollment of 18,880 students and 1,693 scholarship opportunities were provided. From 2019 to 2022, there was a 62% increase in enrollments for bachelor's degrees and higher education levels. During this period, the government also provided numerous study opportunities through loans and scholarships, enabling students to study in over 40 countries.

A total of 2.70 billion MVR was spent on higher education, which includes First Degree Scheme, Higher Education Loan Scheme and scholarships. Moreover, in the government sectors, 12,724 training requirements were identified for 2021-23, with over 7,511 at MQA level five and above. Within this scope, 19 fields have met their individual targets by September 2023. So far, 9,275 individuals have been trained at MQA level five and above surpassing the overall expected figure. The focus is now on training the remaining individuals in the individual fields within the next two years.

The information in this booklet paints a picture of a higher education sector that is continually evolving and growing. There are certainly challenges to be addressed, but the overall trends are positive and indicative of a strong commitment to advancing higher education in the Maldives.

Higher Education Institutions 2019 - 2023

Overview

The information below shows the registered Higher Education Institutions (HEIs) in Maldives as of 30 September 2023. We extend our sincere appreciation to all institutions for their valuable support.

Universities and registered colleges

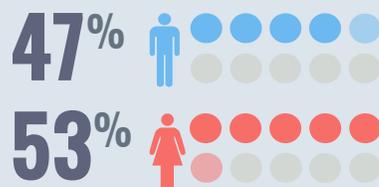

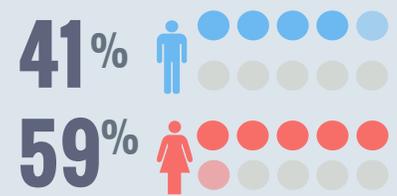

Institutions	Type	Sector
Islamic University of Maldives	University	Public
The Maldives National University	University	Public
MIANZ International College	College	Private
Maldives Business School	College	Private
Mandhu College	College	Private
Avid College	College	Private
Clique College	College	Private
College of Defence and Security Studies	College	Public
National College of Policing and Law Enforcement	College	Public

Field of study not identified	13,213	986	1,474	654
Total	27,421	26,825	26,733	29,016

Note: The 'Fields not identified' category includes fields not represented in the main list. The elevated enrollment figure of 13,213 for 2019 occurred as several institutions reported student data without specifying the associated fields of study. Improvements in data collection and reporting procedures have led to a reduction in this category in the subsequent years.

Higher Education Loan Scheme

Overview

This section provides an illustration of the Higher Education Loan Scheme funding process, detailing the total number of opportunities available, the loans awarded and the utilisation of these loans across all schemes.

Since 2019, a total of six loan schemes were announced. During this period, 3,165 loan opportunities were provided, out of which 2,942 were awarded under Higher Education Loan Scheme. The loan utilisation figures in the chart encompass all utilisations from each year from 2019 to September 2023, capturing data from loan schemes that even preceded 2019.

Higher Education Loan Scheme

Loans awarded and utilisation

Details	2019	2020	2021	2022	2023	Total
Number of loan schemes	2	1	1	1	1	6
Number of opportunities provided	405	550	770	720	1,275	3,720
Number of loans awarded	249	514	450	454	1,275	2,942
Loan utilisation from schemes 2019-23	192	407	349	298	383	1,629
Loan utilisation (all schemes including pre-2019)*	345	339	325	257	475	1,741

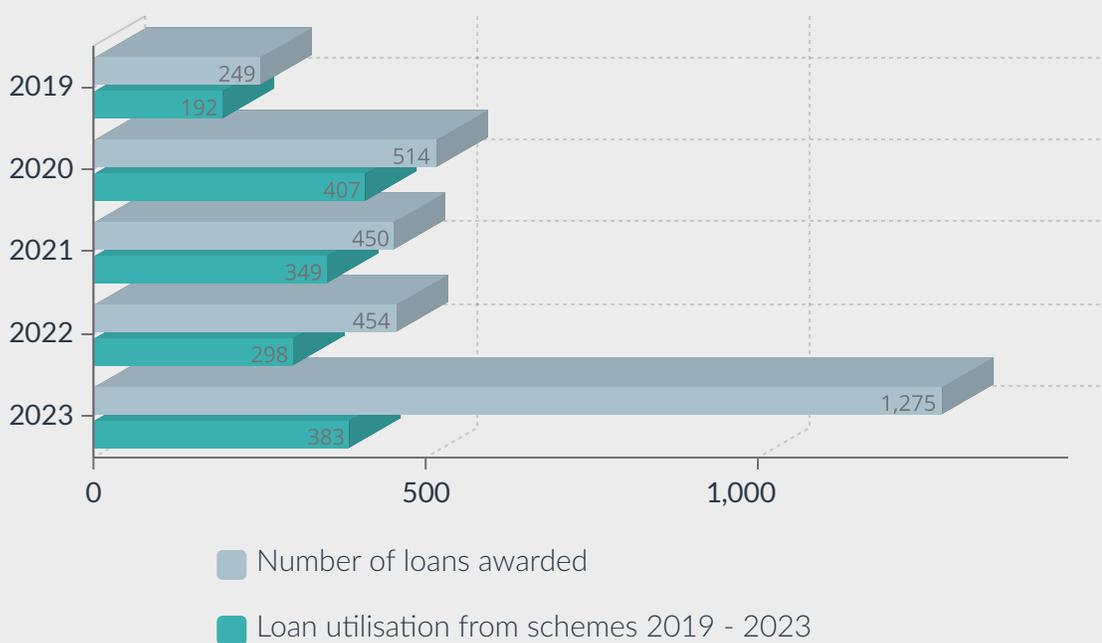

Notes:

(1) Despite an initial allocation for 720 students in 2023, a policy decision was made to award loans under Higher Education Loan Scheme to all eligible candidates. Once a loan is awarded, students have a period of 18 months to utilise the loan.

(2) * Loan utilisation (all schemes including pre-2019) shows a cumulation of loans accessed by candidates from Higher Education Loan Schemes introduced prior to 2019 and continuing up to September 2023.

First Degree Scheme

Overview

The government's First Degree Scheme was inaugurated in February 2019. The information below demonstrates enrollments from 2019 to 2023. It is projected that the scheme will have extended its benefits to over 20,000 students by the end of 2023.

Gender Distribution

2019 - 2023

18,880

cumulatively enrolled and benefitted from the government's First Degree Scheme since its introduction in 2019, through to 30 Sep 2023.

Gender	2019	2020	2021	2022	2023	Total
Male	938	2,037	1,280	1,268	806	6,329
Female	2,003	4,377	2,421	2,384	1,366	12,551
Total	2,941	6,414	3,701	3,652	2,172	18,880

Note: In the government's First Degree Scheme, 3,127 students who were enrolled prior to 2019 transitioned into the scheme upon its launch. Additionally, as of 30 September 2023, the scheme has welcomed 2,172 new students for this year, with further enrollments expected in the coming months.

Scholarships

Overview

Presented below is an overview of the scholarship funding process, encompassing the total scholarship opportunities provided, awards granted and utilisation across all schemes. Between 2019 and 2023, the Ministry announced a total of 156 scholarship schemes, contributing significantly to the promotion of higher education. Please note that the figures provided are current as of 30 September 2023.

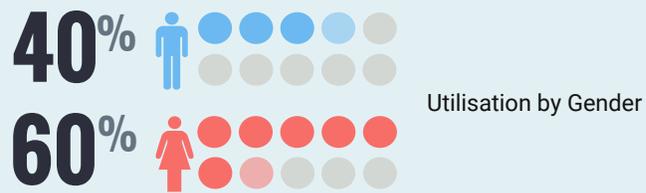

Details	2019	2020	2021	2022	2023	Total
Number of scholarships announced	34	37	33	38	20	162
Number of scholarships opportunities provided	216	181	244	453	599	1,693
Number of scholarships awarded	148	167	120	340	383	1,158
Scholarship utilisation (all schemes)*	91	114	58	228	142	633

Note: The Covid-19 pandemic led to a decrease in scholarship utilisation. In response, we provided the option to extend the timeframe for scholarship utilisation to support students during these challenging times. The data presented in this table is up to 30 September 2023.

Scholarship funding - Maldivian Government

Between 2019 and 2023, the government's expenditure on scholarships was strategically directed to support academic excellence, develop local doctors, foster professional accountants, assist students affected by Covid-19 and support other areas. This expenditure demonstrates the government's commitment to professional development and support during the pandemic.

Scholarships

Scholarships: utilisation and funding

During the years 2019 to 2023, a significant number of scholarships were utilised internationally, with 634 of the 1,695 on offer being accepted by recipients. The Maldivian government funded the majority, offering 851 scholarships. This, along with efforts from other countries through agreements and partnerships, demonstrates a strong international support for educational development in Maldives. Overall, there were 1,244 fully funded scholarships, 375 partially funded, and 76 self-financed, culminating in a total of 1,695 scholarships over the five-year period.

Scholarships: annual funding by type (2019 - 2023)

Year	Fully-funded	Partially-funded	Self-Financed	Total
2019	115	90	15	220
2020	85	69	27	181
2021	142	85	15	242
2022	346	96	11	453
2023	556	35	8	599
Total	1,244	375	76	1,695

Scholarships

Scholarships: educational status and fields

This table provides a detailed summary of the engagement of scholarship holders in various fields of study, including those who started their studies before 2019. It accounts for students who enrolled, graduated, deferred, or withdrew between 2019 and the end of September 2023. At any given point during this period, there were 1,285 students enrolled in courses.

Expenditure on Higher Education

Overview

The government invested approximately 2.70 billion MVR from 2019 to September 2023 in First Degree Scheme, Higher Education Loan Scheme and scholarships. The expenditure on Higher Education Loan Scheme was the highest among all categories, totaling approximately 1.49 billion MVR. However, in 2023, up to the end of September, the highest expenditure was on scholarships, followed by First Degree Scheme and Higher Education Loan Scheme. This marked a shift from previous years when Higher Education Loan Scheme consistently accounted for the highest expenditure. Overall, the government has significantly invested in the education sector, with a notable increase in First Degree Scheme and scholarship expenditures in 2023.

Expenditure on Higher Education

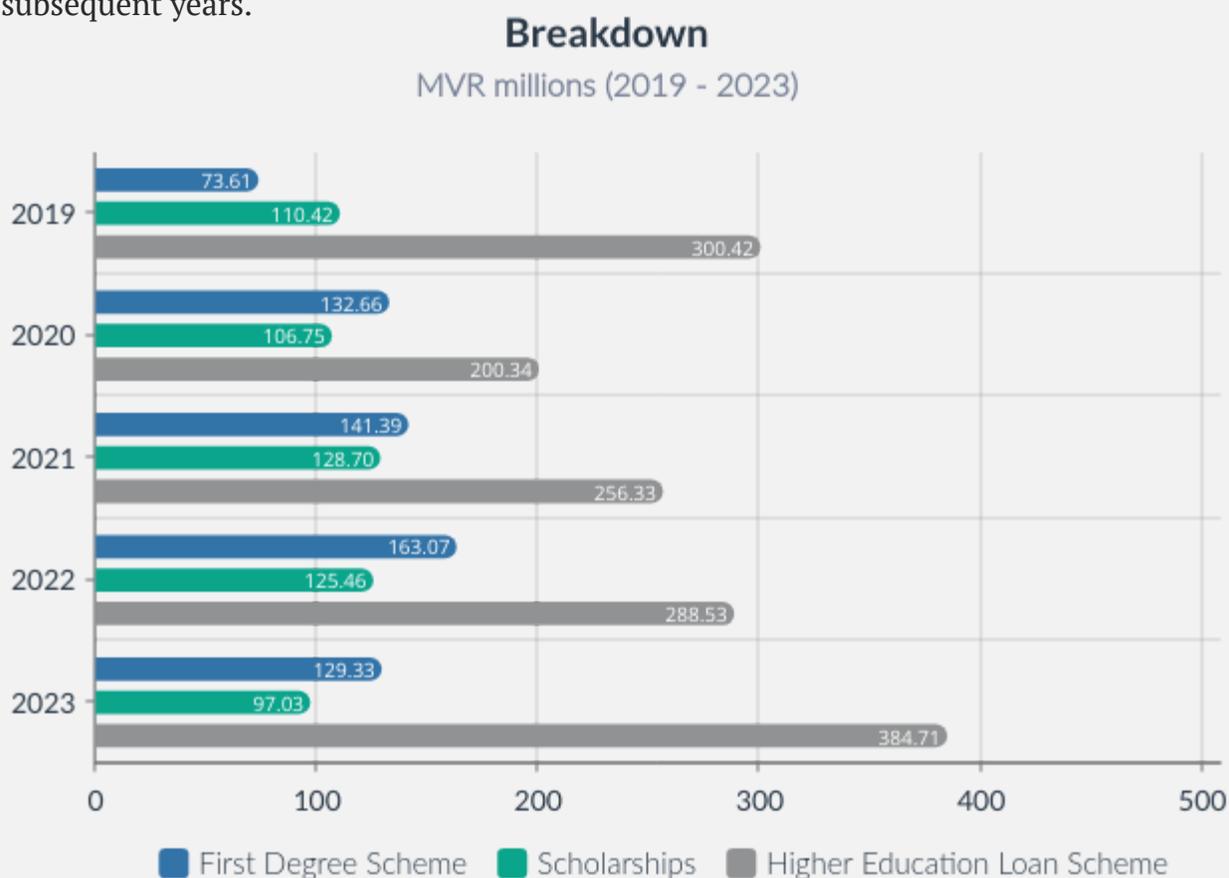

Annual Breakdown

From 2019 to 30 September 2023, the government demonstrated a steadfast commitment to higher education through various initiatives:

First Degree Scheme: The allocation stood at MVR 73.6 million in 2019 and grew significantly to MVR 163.1 million by the end of 2022.

Government Funded Scholarships: In 2019, the figure stood at MVR 110.4 million and saw a gradual rise, culminating in MVR 125.46 million by the end of 2022.

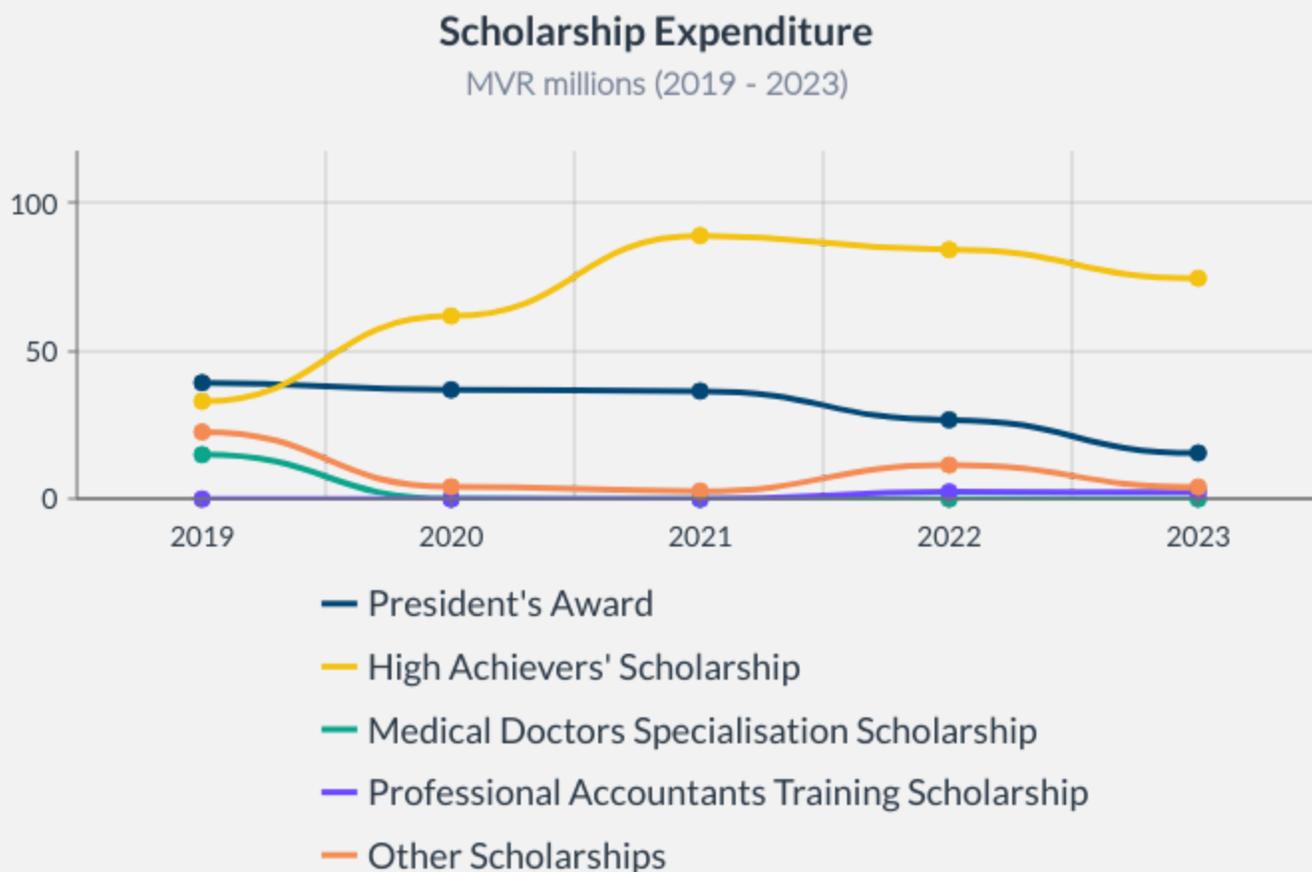

Higher Education Loan Scheme: This initiative received the highest support, with an impressive allocation of MVR 300.4 million in 2019 and robust funding in the subsequent years.

Note: The 2023 data is current as of September 30, 2023.

Government Sector's Training Needs Requirements 2021 - 2023

Overview

Training needs refer to the gap between the current competencies and skills of employees and the competencies and skills required to achieve optimal performance in the government across different fields. Identifying these needs is crucial for the development of targeted training programmes that enhance the workforce's knowledge, skills and abilities, ultimately contributing to the overall effectiveness and efficiency of the government sector.

In 2021, a comprehensive analysis was conducted by the government, which identified a total of 12,724 required trainings across different fields within the government sector of the Maldives. The table in this section provides a detailed breakdown of these training needs by field for MQA level five and above, as well as the total number of individuals that have completed the trainings. The number of required trainings at MQA level five and above was identified as 7,511.

The identification of training needs is a critical component in the strategic development of human capital. It ensures that the government workforce is equipped with the necessary competencies and skills to meet the challenges of today and the future.

- The total number of individuals completed the training process by the end of September 2023 is 9,275.
- The field with the highest number of required trainings completed is management and administration, with a total of 2,843 graduates.
- The necessary trainings for the fields of management and administration, education science, law, accounting and taxation, software and applications development and analysis, finance, banking and insurance, protection of persons and property, motor vehicles, ships and aircrafts, audio-visual techniques and media, production, marketing and advertising, electricity and energy, political sciences and civics, biochemistry, architecture and town planning, journalism and reporting, fashion, interior and industrial design, language acquisition, mechanics and metal trades and chemistry have been successfully concluded.

Conclusion

The data presented highlights our achievements, acknowledges our challenges, and underscores opportunities for future growth. As we continue our pursuit of academic excellence, let these statistics guide our decisions and inspire our collective efforts to make higher education in the Maldives a model of success and progress. Together, we will continue to adapt, innovate and strive for an inclusive, high-quality higher education system that equips our students for a future of success.
